AGENT Hi, you've reached TechSupport for StreamLine Pro. I'm Alex. What can I help you with today?
CUSTOMER Hey Alex! I'm having trouble connecting my StreamLine device to my home WiFi. It keeps saying 'Authentication Failed'.
AGENT No worries, that's usually a quick fix! Are you using the StreamLine 4K model or the standard HD?
CUSTOMER It's the 4K Pro, I got it last week. I'm in Seattle and everything else connects to WiFi fine.
AGENT Perfect, the 4K Pro has a known quirk with WPA3-only networks. Can you check if your network is set to WPA3-only or WPA2/WPA3 mixed?
CUSTOMER Oh interesting! Let me check... it says WPA3 Personal only.
AGENT That's our culprit! If you change it to WPA2/WPA3 compatibility mode, the StreamLine 4K Pro will connect right away.
CUSTOMER Let me try the router setting first — it just connected! Oh wow, that was fast.
AGENT Excellent! The firmware update is still worth doing when you have 10 minutes, it improves streaming stability. I'll send the instructions to your email.
CUSTOMER Perfect, yes please. This is great service, thank you Alex!
AGENT My pleasure! Enjoy your new StreamLine 4K Pro. Have a wonderful day!
